

BREAST CANCER STATISTICS

What is the tgin Foundation?

The tgin Foundation is a 501©(3) not for profit organization founded by the CEO of Thank God It's Natural, Chris-Tia Donaldson.

BLACK WOMEN IN CHICAGO ARE 40% MORE LIKELY TO DIE FROM BREAST CANCER

**WE'RE FIXING THAT.
YOU CAN TOO.**

Our mission is to support uninsured women undergoing treatment for breast cancer, highlight the impact of health disparities on survivor outcomes, and stress the importance of early detection for women under the age of 40.

OVERVIEW:

Race Disparities Among women with breast cancer

Black women in the U.S. are 40% more likely to die from breast cancer than white women. American Cancer Society Cancer Action Network

Black women are
2x

as likely not to be notified of their mammogram results. American Journal of Public Health

The gap in survivor outcomes between black and white women is due to economic, not biological reasons. New York Times

50% more breast cancers are missed at hospitals providing mammograms mainly to black women compared to academic hospitals. New York Times

every 13 mins

a woman in the U.S. loses her life to breast cancer. Susan G Komen

1 in 9

black women will be diagnosed with breast cancer in their lifetime. American Cancer Society

African American women under age 35 have rates of breast cancer two times higher than caucasian women under age 35. Young Survival Coalition

Reducing your Risk of breast cancer

Knowing your family history can lower your risk for breast cancer. Center for Disease control

Breast Cancer Survivor, CEO of Thank God It's Natural (tgin) & the tgin Foundation, Chris-Tia Donaldson:

During Donaldson's treatment, she learned that having money could make the difference between living and dying when it came to treating breast cancer. Donaldson founded the tgin Foundation due to the lack of support and social services for women undergoing treatment. Today she uses her space in the beauty industry to support uninsured women undergoing treatment for breast cancer, education towards the impact of health disparities on survivorship, and the importance of early detection for women under the age of 40.

11% of all new cases of breast cancer in the United States are found in women younger than 45 years of age. Center for Disease Control and Prevention

8 of 10

8 out of 10 breast lumps are non cancerous. Cancer.org

80% of young women find breast abnormalities themselves. Young survival coalition

85% of

85% of breast cancers occur in women who have no known family history of breast cancer. Breastcancer.org

Maintaining a healthy weight and exercising regularly can minimize the risk of all cancer types. American Cancer Society

91% of women diagnosed with breast cancer live 5 years or longer. American Cancer Society

Compared to women who don't drink at all, women who have three alcoholic drinks per week have a 15% higher risk of breast cancer. Breastcancer.org

At least 42% of newly diagnosed cancers are potentially avoidable, including the 19% caused by smoking and the 18% that are caused by a combination of excess body weight, physical inactivity, excess alcohol consumption, and poor nutrition. Cancer.org

Join the fight!

Want to join the fight and help increase breast cancer survivorship and awareness? Here are three ways to get started:

1. Make a donation on our website. The proceeds go towards the tgin Foundation :
<https://tginfoundation.org/donations/donation/>
2. Keep yourself educated by subscribing to our email list.
3. Purchase our "Green Tea Leave-In Conditioner". The proceeds of the sale goes towards the foundation to help further our mission and impact.
